Art Unit: 2835

1. The 4-3-03 amendment has been entered.
2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 19-29,31-34 and 36-43 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. "Annular" recitations in these claims have no original basis either in the written description or the drawings. This language should be deleted.

4. The drawings are objected to under 37CFR1.83(a) as not showing the above structure. Beware of adding new matter.

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 33 and 35-43 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 33, "the inner annular region" lacks antecedent basis.

In claim 35 a cutout and an opening are set forth. Is this intended? The cutout fails to cooperate with any other element in the claim. The claim therefore appears to be incomplete. Please discuss.

Art Unit: 2835

7. Claims 14,16-18 and 44-46 are allowable.
8. Claims 19-29,31-43 are not rejected on art but remain rejected under 112 as explained above.
9. Claim 30 is rejected under 35 U.S.C. 102(b) as being anticipated by Moore. Overhanging sink 40, component 42 and clip 12 with a portion going through sink openings and attaching to the component are clearly seen in the cover figure. All claim 30 elements are present in this teaching.
10. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
